INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to generate liquidity and stable income by investing in a diversified portfolio of primarily short-term fixed income instruments. The Fund aims to provide excess return over the return of the 91-day Philippine Treasury Bill, net of tax.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust / Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The BPI Invest Short Term Fund is suitable only for investors who:

- Are at least classified as moderately conservative based on their risk profile
- Have an investment horizon of at least one (1) year

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in short term domestic fixed income securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/events and/or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.48% in May, as benchmark short-term government yields fell by 7 basis points (bps) on average. Average daily trading volume rose to PHP21.77 billion from April's PHP15.42 billion with trades mostly seen on the long-end of the curve.

The Bureau of the Treasury (BTr) held five Treasury Bill auctions in May. The last auction for the month saw the 91- and 182-, and 364-day papers fully awarded at average rates of 5.783, 5.879%, and 5.948%, respectively. Over the course of May, a total of Php620 billion worth of BSP Bills were issued at a weighted average yield of 6.735%. Towards the end of the month, the BTr released the June auction schedule with four Treasury Bill auctions and five FXTN issuances (9-, 5-, 15-, 6-, and 9-year tenors) each with an offer size of PHP25 billion.

In the local space, April headline inflation fell further to 6.6% year-on-year, lower than market expectations of 7.0% year-on-year. The surprise decline in the April figure resulted from lower energy prices and favorable base effects driving slower food, transport, and utility inflation. The Philippine GDP grew by 6.4% year-on-year in 1st Quarter of 2023, driven by strong household consumption, a boost in capital formation, and increased government spending. During its periodic policy meeting, the Bangko Sentral ng Pilipinas (BSP) paused its tightening cycle and kept its policy rate unchanged at 6.25% as headline inflation continued in a downward trend. The central bank officials reiterated that they remained prepared to adjust policy settings as needed and lowered its inflation forecast for 2023 and 2024 to 5.5% and 2.8%, respectively.

Fund Performance. The Fund returned 0.36% during the month, 6 basis points below the benchmark.

Fund Strategy. The Fund favors the safety of Time Deposits. Expectations of rising rates moving forward may provide an opportunity for better yielding investment outlets.
