KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk: The fund invests in short term domestic fixed income securities, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/events that may lead to a rise in interest rates include adverse market conditions, issuer-specific factors/events and/or negative developments in domestic political and economic conditions.

Liquidity Risk: Investors are exposed to the risk of loss due to the Fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.

Credit/ Default Risk: Investors are exposed to the risk of loss due to the failure of the borrower/ debt issuer to make timely interest and/or principal payments on its deposit liabilities, loans, bonds or other debt instruments due to a deterioration in the borrower's/ issuer's financial condition or external factors and events that may affect its ability to repay financial obligations such as negative developments in domestic political and economic conditions.

Related Party Risk: Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, time deposit placements with the Trustee's own bank and/ or its subsidiary, purchase of debt securities issued by related parties, as well as the execution of trade transactions with related counterparties.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.43% in March, while short-term government yields ended the month mixed. Average daily trading volume for the month amounted to Php19.73 billion, higher than February's Php16.78 billion with trades mostly seen on the belly of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in March. During the last T-Bill auction of the month, the 91-day, 182-day, and 364-day papers were fully awarded at average yields of 5.710%, 5.880%, and 5.982%, respectively. The average weekly offering of BSP Bills for March rose to Php117.5 billion and Php50 billion for the 28-day and 56-day paper, respectively. Over the course of March, a total of Php593 billion worth of 28- and 56-day BSP Bills were issued at weighted average yields of 6.729% and 6.715%, respectively. Towards the end of the month, the BTr announced the borrowing schedule for the second quarter of 2024, with weekly Treasury Bill auctions and monthly FXTN issuances (7-, 10-, 15- and 20-year tenors) and an additional 3-year issuance in May with an offer size of PHP30 billion each.

In the local space, February headline inflation rose by 3.4% year-on-year from previous month's 2.8%. The four straight months of inflation slowdown ended after rice prices rose 23.7% year-on-year due to tight supply and high world prices. BSP Governor Eli Remolona mentioned that while it's too soon to ease policy rates, it is unlikely to tighten more. The policymakers remain ready to adjust the rate settings to maintain price stability.

Fund Performance. The Fund returned 0.35% during the month, 2 basis points ahead the benchmark.

Fund Strategy. The Fund favors the safety of shorter-dated securities and time deposits. Expectations of interest rates staying elevated may help maintain current portfolio yield.
