## Basis of Preparation

The key prudential ratios related to regulatory capital and buffers, leverage ratio and liquidity ratios of BPI Wealth Hong Kong Limited (the “Company”) are calculated in accordance with the Banking (Capital) Rules (“BCR”) and Banking (Liquidity) Rules (“BLR”), respectively.

These regulatory capital ratios represent the solo/combined ratio of the Company under section 3C (1) of the BCR. The Company uses the Basic Approach (“BSC”) in calculating the credit risk of its non-securitization exposures and the Standardised Measurement Approach (“SMA”) in calculating its operational risk. The Company is exempted by the Hong Kong Monetary Authority (“HKMA”) from computing its market risk.

The Company is categorized as category 2 institution by the Hong Kong Monetary Authority (HKMA); thus, the following ratios does not apply: Liquidity Coverage Ratio (“LCR”), Net Stable Funding Ratio (“NSFR”), and Core Funding Ratio (“CFR”).

The regulatory capital, RWA’s, risk-based regulatory capital ratios, and additional buffer requirements are from the Return of Capital Adequacy Ratio submitted to the HKMA on a solo/ combined basis under section 3C(1) of the BCR.

The increase in CET1, Tier 1, and Total Capital ratios from the previous quarter was primarily the result of a net reduction in RWA by 4%, along with a rise in capital owing to income generated in Q1 2026.

The Basel III Leverage Ratio disclosures are from the Return of Leverage Ratio submitted to the HKMA under Part 1C of the BCR.

The reduction in the total leverage ratio (LR) exposure was primarily attributed to a decline in exposure to banks, driven by a decrease in customer time deposits. Additionally, there was an increase in Tier 1 capital, resulting in a higher leverage ratio.

The liquidity condition of the Company is monitored daily by the Company’s Chief Executive. The balance between liquidity and profitability is carefully considered, but the former is given higher priority in case of conflicts in meeting targets or regulatory requirements.

The Company computes its Liquidity Maintenance Ratio (“LMR”) on Hong Kong office basis as required under rule 10(1)(a) of the BLR. The LMR is calculated based on the average value of the LMR for each calendar month, as reported in the Return of Liquidity Position submitted to the HKMA and the ratios presented above are the average quarterly LMR for the reporting period.

The increase in the average LMR from the last quarter was mainly due to the decrease in the average customer’s time deposit that falls within one month.
