BPI INTERNATIONAL FINANCE LIMITED

Basis of Preparation

The key prudential ratios related to regulatory capital and buffers, leverage ratio and liquidity ratios of BPI International Finance Limited (the “Company”) are calculated in accordance with the Banking (Capital) Rules (“BCR”) and Banking (Liquidity) Rules (“BLR”), respectively.

These regulatory capital ratios represent the solo/combined ratio of the Company under section 3C (1) of the BCR. The Company uses the Basic Approach (“BSC”) in calculating the credit risk of its non-securitization exposures and the Basic Indicator Approach (“BIA”) in calculating its operational risk. The Company is exempted by the Hong Kong Monetary Authority (“HKMA”) from computing its market risk.

The regulatory capital, RWA’s, risk-based regulatory capital ratios, and additional buffer requirements are from the Return of Capital Adequacy Ratio submitted to the HKMA on a solo/combined basis under section 3C(1) of the BCR.

The increase in the total RWA from the previous quarter was due to increase in loan exposures and capitalization of Right of Use (ROU) leased asset coupled with an increase in the RWA for Operational risk.

The Basel III Leverage ratio disclosures are from the Return of Leverage Ratio submitted to the HKMA under Part 1C of the BCR.

The liquidity condition of the Company is monitored daily by the Company’s Chief Executive. The balance between liquidity and profitability is carefully considered, but the former is given higher priority in case of conflicts in meeting targets or regulatory requirements.

The Company computes its Liquidity Maintenance Ratio (“LMR”) on Hong Kong office basis as required under rule 10(1)(a) of the BLR. The LMR is calculated based on the average value of the LMR for each calendar month, as reported in the Return of Liquidity position submitted to the HKMA and the ratios presented above are the average quarterly LMR for the reporting period.

The increase in the average LMR from the last quarter was mainly due to the decrease in the average customer’s time deposit that falls within one month.
