DESCRIPTION OF THE BUSINESS

1. Business Development

The Philippine Stock Index Fund, Corp. (“PSIF” of the “Fund”) is a domestic corporation duly authorized to operate as an open-ended investment company. The Fund was incorporated on 11 December 2002 with an authorized capitalization of PhP200,000,000 consisting of 2,000,000 common shares of par value PhP100.00 per share. The Fund was organized and incorporated to engage in the sale of its shares of stock and in the investment of the proceeds of these sales into a basket of stocks that is included in the Philippine Stock Exchange Composite Index (PSEi) designed to provide investment returns that tracks the performance of the Index. In June 2003, the SEC approved the registration of its 3,000,000 new shares bringing total authorized capital from P 200Mn to P 500Mn equivalent to 5,000,000 shares at par value of PhP100.00 each. The Philippine Stock Index Fund is best suited for long term equity investors who believe in the potential of the Philippine Stock Market and who want to achieve returns similar to the PSEI. In February 2006, the stockholders of the Fund approved the increase in the Fund’s authorized capital stock from PhP500Mn to PhP50Billion. The increase to PhP50Billion will be applied in tranches, the first of which is from PhP500Mn to PhP680Mn which was approved by SEC on 5 September 2006. Last 13 September 2007, the increase in authorized capital stock by 7,880,000 shares was approved by SEC. Last July 12, 2013, the SEC approved a further increase in the Fund’s capital stock from 14.68 Million shares (PhP1,468,000,000) to 20 Million shares (PhP2,000,000,000). A further increase from 20 Million shares (PhP2,000,000,000) to 22.4 Million shares (PhP2,240,000,000) was approved by SEC on May 6, 2015. Most recently, a further increase from 22.4 Million shares (PhP2,240,000,000) to 26.4 Million shares (PhP2,640,000,000) was approved by SEC on February 28, 2017.

The investment objective of the Fund is to provide returns that track the performance of the Philippine Stock Exchange Composite Index (“PSEi”). Risk Factors and Investment Considerations

The NAV of the Fund may fluctuate due to changes in the market values of the Fund's investments. Such changes in market value may be attributable to various factors such as:

A. Factors External to the Fund, listed in the order of importance:

- 1) Market Risk - the risk that movement in the financial markets will adversely affect the value of investments of the Fund. To properly manage market risk, various risk measurement methodologies are utilized to quantify the potential change in portfolio value resulting from changes in security prices. Measures of risk-adjusted performance are also utilized. Market risk is controlled through the establishment of investment limits and by managing the fund according to investment guidelines and parameters that are consistent with its return objective and risk profile.
- 2) Liquidity Risk - the risk that the investments of the Fund cannot be sold or converted into cash within a reasonable time or in instances where sale or conversion is possible but not at a fair price. A liquidity contingency plan, which provides a framework for addressing liquidity crisis situations, is in place.
- 3) Tracking Error / Active Risk - the risk that the fund return is not able to mimic its benchmark. To properly manage active risk, the fund manager does a regular rebalancing of the portfolio to match the benchmark index as well as minimize the fund's expenses.

B. Risks Inherent to the Fund, listed in the order of importance:

- 1) Investors in an open-end fund are exposed to the risk of dilution, since other investors are allowed to purchase shares and/or redeem their entire holdings any time. Given this inherent risk, the Fund Manager tries to lessen the frequency of withdrawals by imposing an early redemption fee for investors who redeem from the Fund during the stipulated minimum holding period. By doing this, investors are discouraged to redeem during the minimum holding period, thereby allowing the Fund Manager to maximize the investments during the said period.

2) Unlike closed-end funds, the investment potential and capability of the Fund is limited by liquidity constraints as the Fund Manager should always ensure that there are sufficient liquid assets to service redemptions at any given time.

3) Unlike bank accounts, investment companies / mutual funds are neither insured with the PDIC nor any other agency of the government, nor guaranteed by the Fund Manager. Before investing in the Fund, investors are expected to understand that the Fund is not a bank deposit product and any income, or loss, shall be for the account of the investor. Investors are advised to read the Prospectus of the Fund, which may be obtained from authorized distributors, before deciding to invest. The Fund is registered with the Securities and Exchange Commission.

4) Mutual funds are subject to "manager risk," which is the potential for a fund to fail to achieve its objectives due to investment decisions by the Fund Manager, caused by the Fund Manager's ability, or failure, to "read the market" accurately. To mitigate this risk, the Fund Manager employs a thorough investment process, considering macroeconomic factors and integrating them in asset allocation models to optimize the return of the portfolio. The Fund Manager likewise keeps abreast of current market conditions through various trainings and seminars on fund management techniques as well as close coordination with various counterparties and regulators.

2. Distribution methods of the products or services

The Fund is being distributed by the Principal Distributor through its SEC Certified Investment Solicitors (CISols) and its appointed sub-distributors. Effective March 2025, BPI Wealth assumed the function of Principal Distributor previously held by BPI Investments Inc. (BII).

3. Competition

The Fund operates within the mutual fund industry, a type of collective investment scheme and a sub-sector of the financial services industry. The mutual fund industry offers a broad range of products, covering various asset classes and feeder fund structures. Most providers utilize private networks alongside digital and mobile strategies for distribution. With retail investors as the dominant market segment, investor education remains crucial, alongside key industry trends such as digitalization, evolving investor demographics, regulatory reforms, and a shifting competitive landscape, all of which are influencing how mutual funds operate and attract investors.²

The principal method of competition in this industry is the fund performance or fund return measured as the NAVPS/NAVPU appreciation over time. As an index fund, the Fund seeks to closely track the performance of its Index to outperform the Fund's competition.

The Fund's primary competitors are peer collective investment schemes such as other equity mutual funds and unit investment trust funds available in the Philippines.
