OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines returned 1.59% in March as Philippine dollar-denominated bonds tracked movements in US Treasuries.

Global bonds rallied in March as investors adopted a flight-to-safety stance amid concerns over the health of the banking sector. The US Federal Reserve responded swiftly to the closure of Silicon Valley Bank, ensuring depositors that all their deposits would be protected. Central banks across the globe likewise reiterated their commitment to provide liquidity and stabilize markets as needed. During its March Federal Open Market Committee (FOMC) meeting, the Fed opted to hike rates by another 25 basis points, citing the continued need to cool inflation even as the new challenge of maintaining financial stability emerged. Both US CPI and employment data released during the month continued to support the case for further policy tightening. For the month, the 10-year US Treasury yield fell by 45 basis points to close at 3.47%.

Fund Performance. The Fund returned 0.33% for the month, underperforming its benchmark by 15 basis points. Year-to-date, return amounted to 0.88%, underperforming its benchmark by 53 basis points.

Fund Strategy. The fund will start to gradually lengthen its portfolio duration. We aim to achieve this by participating in the expected ROP issuances that the government usually auctions off at the beginning of the year. Investors in the bond fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
