OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines returned 1.50% in April as Philippine dollar-denominated bonds outperformed US Treasuries.

Global bond movements were mixed in April amid mostly strong economic data releases and a US headline inflation figure that showed price pressures easing further. The CPI of the world's largest economy printed at 5.0% YoY in March, lower than the market estimate and the previous month's 6.0% figure. Meanwhile, the labor market showed some signs of cooling as wage growth slowed to 4.2% year-on-year. Investors continued to closely monitor these indicators as they speculated on what the Federal Reserve's policy rate decisions would be come early May. On the other side of the world, the Chinese economy posted a positive surprise, growing 4.5% YoY. Growth was driven by an improvement in consumer spending as the country's reopening was well underway. For the month, the 10-year US Treasury yield slipped 5 basis points lower to close the month at 3.42%.

Fund Performance. The Fund returned 0.39% for the month, underperforming its benchmark by 6 basis points. Year-to-date, return amounted to 1.28%, underperforming its benchmark by 58 basis points.

Fund Strategy. The fund manager is looking to gradually add duration to the portfolio. This is in light of signs that the Federal Reserve may be nearing the end of its rate hike cycle. Investors in the bond fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
