OUTLOOK AND STRATEGY

Market Review. The US Federal Reserve kept policy rates unchanged at the Federal Open Market Committee (FOMC) meeting last December 15, however the US central bank also announced that they will accelerate the pace of ending their bond purchasing program and is now projected to end their tapering activities earlier than expected. The Fed is also expected to put in at least 3 rate hikes in 2022. This is largely in response to inflation in the US. The word “transitory” has been dropped in their rhetoric to describe inflation and is recently being described more as being “persistent”. The emergence of the new COVID variant, Omicron and the accompanying surge of infected cases in the US and in the rest of the world continues to dampen global economic outlook, with a number of institutions including the World Bank, revising down their growth outlook for the US. The 10 year UST yields rose slightly by 1 basis point, closing the year at the 1.5% levels.

Fund Performance. The Fund returned 0.24% for the month, beating its benchmark by 32 basis points. Year-to-date, return amounted to 0.38%, outperforming its benchmark by 109 basis points.

Fund Strategy. The fund will maintain its current duration. Investors in the bond fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
