OUTLOOK AND STRATEGY

Market Review. In the Eurozone, the ECB raised policy rates by 75 basis points which brought rates for marginal lending, main refinancing, and deposit to 1.50%, 1.25%, and 0.75%, respectively. This frontloaded the transition from the prevailing highly accommodative level of policy rates towards levels that will ensure the timely return of inflation to the ECB's 2% medium-term target. The Governing Council noted that it expects to raise interest rates further to dampen demand and guard against the risk of a persistent upward shift in inflation expectations. Month-on-month, the 10-year Bund rose by about 57 basis points to 2.11% on September 30.

Fund Performance. The Fund returned -1.19% for the month, underperforming its benchmark by 123 basis points. Year-to-date, return amounted to -5.13%, underperforming its benchmark by 545 basis points.

Fund Strategy. The fund will maintain its current duration. Investors in the bond fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
