OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines returned 1.59% in March as Philippine dollar-denominated bonds tracked movements in US Treasuries.

Global bonds rallied in March as investors adopted a flight-to-safety stance amid concerns over the health of the banking sector. The US Federal Reserve responded swiftly to the closure of Silicon Valley Bank, ensuring depositors that all their deposits would be protected. Central banks across the globe likewise reiterated their commitment to provide liquidity and stabilize markets as needed. During its March Federal Open Market Committee (FOMC) meeting, the Fed opted to hike rates by another 25 basis points, citing the continued need to cool inflation even as the new challenge of maintaining financial stability emerged. Both US CPI and employment data released during the month continued to support the case for further policy tightening. For the month, the 10-year US Treasury yield fell by 45 basis points to close at 3.47%.

The Eurozone inflation rate eased slightly in February, decreasing from 8.6% to 8.5%. The main contributor to inflation was food, alcohol, and tobacco, as anticipated. However, core inflation, which excludes energy and food costs, rose from 5.3% in the previous month to 5.6% in February. As inflation remained significantly above the targeted level of 2%, the European Central Bank raised policy rates by 50 basis points, setting it at 3.50%. Month-on-month, the 10-year German Bund fell by about 33 basis points to 2.31% on March 31.

Fund Performance. The Fund returned 0.15% for the month, underperforming its benchmark by 7 basis points. Year-to-date, return amounted to 0.42%, underperforming its benchmark by 17 basis points.

Fund Strategy. The fund will maintain its current duration. Investors in the bond fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
