OUTLOOK AND STRATEGY

Market Review. Eurozone inflation rose to 7.0% in April from 6.9% recorded in March as rising services and energy costs offset a slowdown in food price growth. Although underlying price growth has moderated slightly in recent months, the vital services component has continued to accelerate, pointing to increasing wage pressures that could keep inflation beyond the European Central Bank's 2% objective.

Fund Performance. The Fund returned 0.08% for the month, underperforming its benchmark by 17 basis points. Year-to-date, return amounted to 0.62%, underperforming its benchmark by 43 basis points.

Fund Strategy. The fund will maintain its current duration. Investors in the bond fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
