## OUTLOOK AND STRATEGY

**Market Review.** The Philippine Stock Exchange (PSEi) rose for a second consecutive month in June, rising 4.1% for the month and paring the year-to-date losses to 3.3%. The month-on-month strength was mainly due to the ramp-up in vaccinations in the country, as well as lower daily COVID-19 case counts in Metro Manila. Providing further support to the market was May inflation coming out in line with estimates at 4.5% yoy, with the BSP also keeping the policy rate unchanged during their Monetary Board meeting this month. While the index reached an intra-day high of 7,001 for the month, the market soon corrected following the US Federal Reserve meeting, in which commencing the discussion of tapering the Fed's bond purchases in the following meetings was brought up. Despite being buyers for the first half of the month, foreigners continued to be net sellers in June, with portfolio outflows amounting to PHP3.88 billion or USD79.5 million for the month.

Top gainers for the month include EMP (+30.8%), ICT (+14.4%), and DMC (+13.1%), with the largest month-on-month detractors being LTG (-6.5%), SECB (-3.3%), and BLOOM (-2.5%). Year-to-date, ICT (+32.6%), EMP (+26.7%), and DMC (+11.1%) were the best performers, while MEG (-20.8%), BLOOM (-19.7%), and RLC (-18.5%) were the worst performers.

**Fund Performance.** The Fund returned 3.75% for the month, outperforming its benchmark by 3 basis points. Year-to-date, return amounted to -2.46%, underperforming its benchmark by 43 basis points.

**Fund Strategy.** We are looking to maintain our equity position at current levels, being opportunistic in the short term to lock in gains as the index nears the 7,000 resistance level while keeping our strategic weight on equities in the long term. We continue to like liquid names that are poised to recover as the economy starts to re-open, as well as names that would benefit from loose monetary policy.
