OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange (PSEi) was up for a second consecutive month to close at 6,953, rising 1.4% in September and paring the year-to-date losses to 2.6%. The month-on-month strength was mainly due to the move to a less restrictive general community quarantine for Metro Manila, with the introduction of a new lockdown system which put the capital at Alert Level 4 for the second half of September. However, the market faced several headwinds during the month, including higher-than-expected inflation (4.9% in August vs. est. 4.4%), risk-off sentiment due to the possible default of Chinese property company Evergrande, and higher inflation forecasts by the BSP in their latest meeting despite keeping policy rates steady. Due to these, foreigners became net sellers once more, with portfolio outflows amounting to PHP2.42 billion or USD47.5 million for September.

Top gainers for the month include CNVRG (+29.0%), FGEN (+20.0%), and LTG (+18.1%), with the largest month-on-month detractors being URC (-10.0%), SECB (-6.4%), and GTCAP (-5.6%). Year-to-date, CNVRG (+168.5%), ICT (+59.3%), and GLO (+47.0%) were the best performers, while MEG (-30.2%), BLOOM (-26.8%), and RLC (-24.5%) were the worst performers.

Fund Performance. The Fund returned 0.38% for the month, underperforming its benchmark by 91 basis points. Year-to-date, return amounted to -2.27%, underperforming its benchmark by 10 basis points.

Fund Strategy. We are looking to maintain our equity position at current levels, being opportunistic in the short term to take profit on select names as the index approaches the 7,000 level but keeping our strategic weight on equities in the long term. We continue to like liquid names that are poised to recover as the economy starts to re-open, as well as names that would benefit from loose monetary policy.
