OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) retreated in May and this could be attributed to the following concerns: 1) Worries over potentially more rate hikes from US Federal Reserve 2) US Debt Ceiling deadlock, and 3) Uncertainties on Bangko Sentral ng Pilipinas' (BSP) monetary policy stance. The weakness of the Philippine Peso against the greenback (US Dollar) after falling to a six-month low at Php56.31 and the MSCI rebalancing – where the Philippines had a general down-weight causing significant net foreign outflow, further added downward pressure to share prices. The local bourse index dropped 2.2% to below 6,500-mark at 6,477.

Activity for the month of May improved with Average Daily Turnover registering at Php 5.04 billion or 18.2% higher than prior period's Php4.27 billion. This was mainly driven by the MSCI rebalancing event at close of business (COB) on the last trading day of May. In terms of flows, foreigners reverted to net-selling in May at US\$81 million driven mainly by the MSCI rebalancing. Foreign participation was higher at 53% in the same period.

On stock performance in May, the top gainers are as follows: GTCAP (+7.95%), JFC (+4.71%) and SM (+3.80%). Meanwhile, here are the biggest laggards for the month: MONDE (-13.37%), ICT (-10.14%) and ICT (-7.80%).

Fund Performance. The Fund returned -1.72% for the month, beating its benchmark by 24 basis points. Year-to-date, return amounted to 0.01%, outperforming its benchmark by 103 basis points.

Fund Strategy. The Fund will remain defensive as volatility heightens across global markets. Increasing worries over a potential US recession, sticky global inflation and elevated interest rates continue to hamper investor sentiment. However, we will take advantage of the volatility in buying quality names on dips and sell on excessive market rallies.
