OUTLOOK AND STRATEGY

Market Review. The Philippine inflation continued to accelerate in November 2022, rising by 8.0% from the 7.7% recorded in the previous month and ahead of the 7.8% consensus estimate for the month. Consequently, the BSP hiked policy rates by 50 basis points to 5.50% in its December meeting but has indicated that the pace of rate hikes in 2023 will slow down. Month-on-month, the PH BVAL rates ended lower. Yields on the 1-year fell by about 5 basis points to 5.1%, the 2- to 7-year by about 13 basis points on average, and the 10-year by about 21 basis points to 6.99% on December 29.

Fund Performance. The Fund returned 0.11% for the month, underperforming its benchmark by 20 basis points. Year-to-date, return amounted to 1.55%, underperforming its benchmark by 10 basis points.

Fund Strategy. The fund will maintain its current underweight position in terms of duration. Investors in the bond fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
