• THE FUND IS AVAILABLE TO RESIDENT CITIZENS OR INVESTORS OF LEGAL AGE, OR BY DULY AUTHORIZED AND EXISTING CORPORATIONS, PARTNERSHIPS OR OTHER ENTITIES, SUBJECT TO EXISTING PHILIPPINE LAWS.

## **OUTLOOK AND STRATEGY**

**Market Review.** The BPI Money Market Index returned 0.38% in June, while short-term government yield movements were flat compared to previous month's level. Average daily trading volume for the month amounted to Php20.86 billion, lower than May's Php23.86 billion with trades mostly seen on the belly of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in June. During the last T-Bill auction of the month, the 91day, 182-day, and 364-day papers were fully awarded at average yields of 5.666%, 5.930%, and 6.031%, respectively. The average weekly offering of BSP Bills for June fell to Php97.5 billion for the 28-day paper and the 56-day paper fell to Php60 billion. Over the course of June, a total of Php596 billion worth of 28- and 56-day BSP Bills were issued at weighted average yields of 6.675% and 6.665%, respectively. The Bureau of Treasury (BTr) announced its borrowing program for the third quarter of 2024, with weekly Treasury bill offers increased to PHP 20 billion. The BTr plans to issue more tenors for the quarter, offering PHP 30 billion each for the 3-, 5-, 7-, and 10- year while the 14- and 20-year Treasury bond offers were reduced to PHP 25 billion.

In the local space, May headline inflation accelerated for the fourth straight month by 3.9% year-on-year from the previous month's 3.8%. The main drivers of inflation included housing, water, electricity, and gas while rice prices saw a deceleration from the previous figure of 23.9% to 23%. In an effort to curb elevated rice prices, the National Economic Development Authority (NEDA) Board approved the new Comprehensive tariff program which reduces tariff rates for rice imports alongside other essential commodities effective until 2028. The Bangko Sentral ng Pilipinas (BSP) held its policy rate steady at 6.5% during their Monetary Board meeting in June. Despite the weakening Peso, BSP Governor Eli Remolona had dovish remarks on the possibility of an August rate cut, which is ahead of the market expectations of the Federal Reserve to begin easing in September. The BSP revised both its 2024 and 2025 inflation forecast to 3.1% from 3.8% and 3.7%, respectively.

**Fund Performance.** The Fund returned 0.32% for the month, underperforming its benchmark by 3 basis points. Year-to-date, return amounted to 1.83%, underperforming its benchmark by 43 basis points.

**Fund Strategy.** The fund will maintain its current overweight position in terms of duration. Investors in the money market fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium-term.
