 • THE FUND IS AVAILABLE TO RESIDENT CITIZENS OR INVESTORS OF LEGAL AGE, OR BY DULY AUTHORIZED AND EXISTING CORPORATIONS, PARTNERSHIPS OR OTHER ENTITIES, SUBJECT TO EXISTING PHILIPPINE LAWS.

OUTLOOK AND STRATEGY

Market Review. In August, the Philippine fixed income market showed mixed performance across tenors, reflecting cautious investor sentiment amid global and domestic developments. The Retail Treasury Bonds Tranche 31 (RTB-31), a five-year peso-denominated bond, was also launched, priced at a final coupon of 6.00% per annum. The offering attracted strong investor interest, raising PHP210 billion from PHP354.18 billion in tenders on the first day of the offer period. For this issuance, the government raised a total of PHP507 billion.

Philippine inflation eased to 0.9% in July, well below the target range of 2-4%, further supporting bond market stability. As a result, the Bangko Sentral ng Pilipinas reduced its policy rate by 25 bps to 5.00%, marking a continuation of its easing cycle. BSP Governor Eli Remolona described it as a “Goldilocks rate”, designed to stimulate economic activity while keeping inflation in check. Performance across BPI’s domestic fixed income indices reflected this easing bias. The BPI GS Overall Index returned 1.08%, led by the BPI GS 5+ Index, which gained 1.54%. Shorter-duration indices posted more modest returns, with the BPI GS 1-3 Index up 0.53% and the Money Market Index rising 0.37%.

Looking ahead, the outlook remains cautiously optimistic. Locally, the benign inflation environment and the BSP’s recent 25 bps rate cut for overnight borrowing (and 5.50% for lending) provide further support for lower yields.

Fund Performance. The Fund returned 0.41% for the month, outperforming its benchmark by 7 basis points. Year-to-date, return amounted to 2.95%, underperforming its benchmark by 6 basis points.

Fund Strategy. The fund will maintain its current overweight position in terms of duration. Investors in the money market fund must be prepared to withstand short term volatility as higher investment value is normally achieved over the medium term.
