OUTLOOK AND STRATEGY

Market Review. In December, local bond yields posted a month-on-month increase of 10.26 basis points across the curve. Short-term yields of one year and below bucked the trend, declining by an average of 3.22 basis points. The rise in yields was most pronounced in the intermediate segment as investors took profits toward year-end. Five- and seven-year tenors saw the largest increases at 22.91 basis points and 20.51 basis points, respectively, followed by the three-year tenor, which rose by 19.09 basis points. Meanwhile, long-end yields rose by around 8.24 basis points amid growing concerns over economic growth prospects.

The BPI Money Market Index gained 0.32%, while the BPI 1–5 Year Index edged down by 0.01% and the BPI GS Overall Index declined by 0.16%.

On the macro front, November inflation settled at 1.5%, remaining below the government's 2% to 4% target range and easing from October's 1.7% print. The BSP maintained a dovish stance, reinforcing market expectations for further policy easing after cutting the monetary policy rate in December, with the possibility of additional cuts in 2026. Following the latest rate cut, the policy rate stands at 4.5%, with markets pricing in a potential move toward 4.0% in 2026.

Fund Performance. The Fund returned 0.43% for the month, outperforming its benchmark by 11 basis points. Year-to-date, return amounted to 4.51%, outperforming its benchmark by 9 basis point.

Fund Strategy. The fund will maintain its current overweight position in terms of duration. Investors in the money market fund must be prepared to withstand short term volatility as higher investment value is normally achieved over the medium term.
