OUTLOOK AND STRATEGY

Market Review. Short-dated yields declined in July, while yields across the intermediate and long end of the curve moved higher. Month-on-month, the 1-month, 3-month, and 6-month BVAL declined by 17 bps, 15 bps, and 8 bps, respectively, while the 1-year BVAL was unchanged at 5.95%. In contrast, yields from the 2-year to 20-year tenors increased by an average of 53 bps, amid renewed geopolitical tensions and concerns over the inflationary impact of higher oil prices.

During the July 27 Treasury bill auction, total tenders reached PHP 134.52 billion against a PHP 50.00 billion offering, equivalent to an overall bid-to-cover ratio of 2.69x. The 364-day tenor attracted PHP 28.86 billion in total tenders against a PHP 10.00 billion offering, translating to a bid-to-cover ratio of 2.89x. Meanwhile, the 91-day and 182-day tenors received PHP 56.86 billion and PHP 48.80 billion in tenders, corresponding to bid-to-cover ratios of 2.84x and 2.44x, respectively. Auction yields settled at 5.059% for the 91-day bill, 5.671% for the 182-day bill, and 5.950% for the 364-day bill.

Market sentiment remained cautious in July amid renewed geopolitical tensions in the Middle East and concerns over the inflationary impact of higher oil prices. Against this backdrop, movements in the yield curve were mixed, with yields declining across the money-market segment while yields on intermediate- to long-dated government securities moved higher.

Fund Performance. The Fund returned 0.41% for the month, outperforming with its benchmark by 6 basis points. Year-to-date, return amounted to 2.21%, underperforming its benchmark by 4 basis points.

Fund Strategy. The Fund favors the safety of shorter-dated securities and time deposits. With the expectation of increased volatility this year due to upside risks to inflation, the fund manager aims to maintain a nimble portfolio position to take advantage of any opportunities.
