OUTLOOK AND STRATEGY

Market Review. The Philippine economy grew by 7.6% in 3Q22, faster than the 7.1% recorded in 3Q21 and 7.5% in 2Q22. The 3Q22 GDP growth also exceeded the consensus expectations of 6.1%, with household consumption and investments driving strong performance during the period. Meanwhile, the BSP delivered its second 75 basis-point rate increase this year as it sought to support the peso and cool inflation by matching the pace of hikes by the Fed. This brought the policy rate to 5.0%, in line with expectations. Month-on-month, PH BVAL reference rates ended mixed. The 1-year yield rose by about 38 basis points to 5.26%, the 2- and 3-year yields by about 4 basis points on average; on the other hand, the 4- to 7-year yields fell by about 12 basis points on average, and the 10-year yields by about 25 basis points to 7.19% on November 30.

Fund Performance. The Fund returned 0.21% for the month, underperforming its benchmark by 7 basis points. Year-to-date, return amounted to 0.17%, underperforming its benchmark by 48 basis points.

Fund Strategy. The Fund will maintain its current duration and will be opportunistic in any increase in short-term rates.
