OUTLOOK AND STRATEGY

Market Review. Philippine inflation for the month of April was 6.6% year-on-year, down from 7.6% in March. The amount was once again lower than market estimates, owing to easing supply-side pressures. As a result, the BSP refrained from raising interest rates during its mid-month Monetary Board meeting, noting the recovery in local prices. Nonetheless, policymakers reaffirmed that they were ready to adjust policy settings as needed, and that lower inflation would allow them greater leeway in the future. Month-on-month, PH BVAL rates closed lower with the 1-year falling by about 22 basis points to 5.92%, the 2-7-year falling by an average of 18 basis points, and the 10-year falling by about 25 basis points to 5.86%.

Fund Performance. The Fund returned 0.38% for the month, underperforming its benchmark by 5 basis points. Year-to-date, return amounted to 1.61%, underperforming its benchmark by 2 basis points.

Fund Strategy. The fund will maintain its current neutral position in terms of duration. Investors in the money market fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
