OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.41% in August, while benchmark short-term government yields rose by 8 basis points (bps) on average. The average daily trading volume for the month amounted to PHP16.82 billion similar to July's PHP16.94 billion with trades mostly seen on the short-end of the curve.

The Bureau of the Treasury (BTr) held five Treasury Bill auctions in August. During its last T-Bill auction for the month, the three tenors were fully awarded with the average yield of the 91-day paper falling to 5.573% while the 182-, and 364-day papers rose to 5.993%, and 6.297%, respectively. The BSP decreased its weekly offering of BSP Bills to PHP20 billion for the 56-day paper and PHP100 billion for the 28-day paper by the end of the month. Over the course of August, a total of Php498 billion worth of 28- and 56-day BSP Bills were issued at weighted average yields of 6.717% and 6.728%, respectively. Towards the end of the month, the BTr released the September auction schedule with four Treasury Bill auctions and four PHP30 billion FXTN issuances (3-, 7-, 10-, and 3-year tenors).

In the local space, July headline inflation eased further to 4.7% year-on-year, from last month's 5.4%. The food, utilities and transport prices drove the inflation lower marking six straight months of deceleration. The Philippine economy grew more weakly than expected at 4.3% in the second quarter of the year, compared to the market expectation of 6%. Growth momentum was at its slowest pace since 2011 due to above target inflation, elevated borrowing costs, and government underspending. The Bangko Sentral ng Pilipinas (BSP) kept its policy rate at 6.25% for the third time. BSP Governor Eli Remolona reiterated that they remain data-dependent but ready to hike policy rates if necessary. The BSP revised its inflation forecast upward, settling at 5.6% (from 5.4%) for 2023 and 3.3% (from 2.9%) for 2024 due to developments in global energy and food prices.

Fund Performance. The Fund returned 0.36% for the month, underperforming its benchmark by 3 basis points. Year-to-date, return amounted to 2.64%, underperforming its benchmark by 13 basis points.

Fund Strategy. The fund will maintain its current overweight position in terms of duration. Investors in the money market fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
