OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.45% in May, as short-term government yields fell by an average of 5.65 basis points (bps). Average daily trading volume for the month amounted to Php23.86 billion, higher than April's Php14.73 billion with trades mostly seen on the short-end of the curve.

The Bureau of the Treasury (BTr) held four Treasury Bill auctions in May. During the last T-Bill auction of the month, the 91-day, 182-day, and 364-day papers were fully awarded at average yields of 5.719%, 5.886%, and 6.043%, respectively. The average weekly offering of BSP Bills for May rose to Php120 billion for the 28-day paper and the 56-day paper rose to Php70 billion. Over the course of May, a total of Php807 billion worth of 28- and 56-day BSP Bills were issued at weighted average yields of 6.673% and 6.676%, respectively.

In the local space, April headline inflation rose by 3.8% year-on-year from the previous month's 3.7%. Food, transport, and restaurants were the main driver of inflation, though the increase in rice prices slowed for the first time in six months. Nonetheless, the inflation print remained within the central bank's 2 to 4% target range. The country's economy grew by 5.7% year-on-year for the first quarter of 2024, lower than consensus estimate of 5.9%. While net exports contributed positively for the period, other sectors such as private consumption and government spending appeared to be slowing. The first quarter GDP growth figure falls short of the government's official target of 6-7% for the year.

Fund Performance. The Fund returned 0.44% for the month, outperforming its benchmark by 4 basis points. Year-to-date, return amounted to 1.74%, underperforming its benchmark by 16 basis points.

Fund Strategy. The fund will maintain its current overweight position in terms of duration. Investors in the money market fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
