OUTLOOK AND STRATEGY

Market Review. The BPI Money Market Index returned 0.39% in August, as short-term government bond yields saw limited movement. Average daily trading volume for the month reached Php41.3 billion, up from Php34.5 billion in July, with most activity in 5- to 10-year securities. The Bureau of the Treasury (BTr) held four Treasury Bill auctions in August, all of which were fully awarded. The final Treasury bill auction concluded with average yields of 5.966%, 5.996%, and 6.022% for the 91-day, 182-day, and 364-day bills, respectively. Additionally, the BSP held four BSP Bill auctions in August, all of which were fully awarded as well. The last BSP bill auction saw average yields of 6.376% and 6.470% for the 28-day and 56-day bills, respectively.

Domestically, July headline inflation accelerated to 4.4% from 3.7% in June, above economists' median forecast of 4.0%. The uptick in inflation was driven mainly by higher costs in housing & utilities (2.3% vs 0.1% in June), education (5.8% vs 3.8%), transport (3.6% vs 3.1%), and food & non-alcoholic beverages (6.4% vs 6.1%). Despite this, the BSP implemented a 25-bp rate cut in August, its first in four years. Economists are predicting that inflation may have moderated to 3.7% in August.

Globally, US inflation slowed from 3.0% in June to 2.9% in July, slightly below the 3.0% forecast. US Federal Reserve officials emphasized progress in reducing inflation and pointed to slowing economic data, signaling the potential for future rate cuts.

Fund Performance. The Fund returned 0.37% for the month, underperforming its benchmark by 2 basis point. Year-to-date, return amounted to 2.93%, underperforming its benchmark by 16 basis points.

Fund Strategy. The fund will maintain its current overweight position in terms of duration. Investors in the money market fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
