OUTLOOK AND STRATEGY

Market Review. December inflation eased to 3.6%, the lowest for the year, due to slower increases in food prices. Full year 2021 inflation amounted to 4.5%, above the Bangko Sentral ng Pilipinas' 2%-4% target, mainly driven by meat, transportation, and energy prices. The Philippine economy grew 7.7% in Q4 2021, beating expectations and bringing full year GDP growth to 5.6% in 2021, as household consumption and government expenditure increased. Bangko Sentral ng Pilipinas Governor Diokno has stated that he would like to see four to six quarters of economic growth before considering a policy rate increase, and the BSP will be unlikely to touch policy rates in the first half of 2022. The next policy rate meeting will be on February 17, 2022.

Amid flush market liquidity, yields for government securities 3 years and shorter were down by 3-20 bps while those with tenors of 7 years and longer were up by 5-18 basis points in January. The Bureau of the Treasury will continue to offer PHP 60 Bn in Philippine Treasury bills and PHP 140 Bn in 4, 10, and 7 year bonds in February.

Fund Performance. The Fund returned 0.04% for the month, underperforming its benchmark by 14 basis points. Year-to-date, return amounted to 0.04%, underperforming its benchmark by 14 basis points.

Fund Strategy. The fund will maintain its liquidity and current duration. Investors in the bond fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
