OUTLOOK AND STRATEGY

Market Review. The Philippine economy grew 7.4% in the second quarter of the year, falling behind the expected 8.4% growth for the period as rising inflation levels curbed consumer spending. To curb the accelerating inflation, the Bangko Sentral ng Pilipinas raised for the fourth time this year the overnight borrowing rate by 50 bps to 3.75%. The Central Bank is now set to deliver hikes of 25 to 50 basis points in the coming meetings depending on the data. Month-on-month, yields mostly closed lower except for the 1-year which rose by about 59 basis points to 3.87%. The 2- to 7-year fell by an average of 17 basis points while the 10-year also fell by about 17 basis points to close at 6.11% on August 31.

Fund Performance. The Fund returned 0.29% for the month, outperforming its benchmark by 3 basis points. Year-to-date, return amounted to 0.36%, underperforming its benchmark by 8 basis points.

Fund Strategy. The fund will maintain its liquidity and retain its current underweight position, in terms of duration. Investors in the bond fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
