OUTLOOK AND STRATEGY

Market Review. Inflation continue to accelerate, with the September print coming in at 6.9% from 6.3% in August due to higher food and electricity prices. Late in the month, BSP Gov. Medalla noted that the central bank will consider a 50-bp to 75-bp increase on its November 17 policy meeting to help cool inflation and ease currency depreciation stemming from strong dollar amid the Fed's hawkish stance. Based on this, benchmark rates could rise to at least 4.25% by November. Month-on-month, PHP BVAL reference rates continue to climb. The 1-year yield rose by about 99 basis points to close at 4.89%, the 2- to 10-year yields rose by an average of 57 basis points, while the 10-year yield rose by about 40 basis points to close at 7.44%.

Fund Performance. The Fund returned 0.10% for the month, beating its benchmark by 24 basis points. Year-to-date, return amounted to 0.34%, outperforming its benchmark by 12 basis points.

Fund Strategy. The fund will maintain its liquidity and retain its current underweight position, in terms of duration. Investors in the bond fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
