- THE FUND MANAGER IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned -1.33% in October as the local yield curve bear steepened, rising 45 basis points (bps) on average. Average daily trading volume for the month amounted to PHP10.15 billion lower than September's PHP18.22 billion with trades mostly seen on the short-end of the curve.

The Bureau of the Treasury (BTr) held only three FXTN auctions in October. The 5-year FXTN 10-64, 7-year FXTN 7-70, and 10-year FXTN 10-71 re-issuances were fully awarded at average yields of 6.512%, 6.675%, and 6.954%, respectively. Towards the end of the month, the BTr released the November auction schedule with five Treasury Bill auctions and five FXTN issuances (5-, 7-, 10-, 15-, and 6-year tenors) with an offer size of PHP30 billion each.

In the local space, September headline inflation rose by 6.1% year-on-year, exceeding market expectations of 5.7%. Coming from last month's 5.3%, inflation continued to accelerate as food and energy prices jumped with rice prices surging 17.9% year-on-year. Consequently, the Bangko Sentral ng Pilipinas (BSP) delivered an off-cycle rate hike, raising its key policy rate by 25 basis points in an effort to subdue the persistent price pressures. The BSP's FY2024 inflation forecast was raised to 4.7% from the previous 4.3%. With regard to the upcoming November Monetary Board meeting, the central bank noted that it would remain data dependent in considering the future path of policy rates.

Fund Performance. The Fund returned 0.11% for the month, underperforming its benchmark by 9 basis points. Year-to-date, return amounted to 2.45%, underperforming its benchmark by 99 basis points.

Fund Strategy. The fund manager is looking to gradually add duration since the BSP has decided to pause hiking rates in their last 2 policy rate meetings given the easing inflationary environment. Investors in the bond fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
