OUTLOOK AND STRATEGY

Market Review. Philippine government bond prices rebounded in June as yields declined sharply, supported by improving global risk sentiment and lower oil prices. International oil benchmark prices fell from $92 to $73 per barrel following positive developments in US-Iran negotiations, which led to a memorandum of agreement allowing the reopening of the Strait of Hormuz. While oil tanker flows have resumed, volumes remain below pre-conflict levels.

Domestic factors also contributed to the rally, as Philippine headline inflation surprised to the downside at 6.8% in May, below market expectations of 7.8%. The decline in oil prices further reinforced expectations of easing inflation pressures.

During the month, bond yields fell by an average of 32 basis points, with the 5-year benchmark yield declining from 7.34% to 6.75%. Despite the improvement in yields, investor sentiment remained cautious, with foreign investors recording net outflows of Php11 billion, bringing year-to-date outflows to Php265 billion.

The Bureau of the Treasury raised Php160 billion through its regular bond auctions, exceeding its Php140 billion target, as lower yields allowed the government to accept more bids.

Fund Performance. The Fund returned 0.36% for the month, underperforming its benchmark by 30 basis points. Year-to-date, return amounted to 0.70%, underperforming its benchmark by 91 basis points.

Fund Strategy. The Fund looks to maintain a nimble portfolio position to take advantage of any opportunities as global inflation is seen to increase over the next few months as an effect of the ongoing geopolitical tensions in the Middle East. Volatility may persist in the near term driven by global factors, and the portfolio will be actively managed to take advantage of this. Investors in the bond fund must be prepared to withstand volatility as higher investment value is normally achieved over the medium to long term horizon.
