OUTLOOK AND STRATEGY

Market Review. The BSP began its tightening cycle by raising policy rates by 25 basis points to 2.25% after a year of keeping rates steady, as inflation continues to rise alongside the economic recovery of the country. BSP Gov. Diokno also signaled that he was inclined to hike key rates by another 25 basis points at the next policy meeting on June 23. The BSP also revised its inflation forecast this year to 4.6% from 4.3% previously, above the 2-4% target band, after inflation reached a 3-year high of 4.9% in April amid food and utilities price increases. The central bank also hiked its 2023 inflation forecast to 3.9% from 3.6%. Month-on-month, yields of government securities rose across the board. The 1-year Philippine T-Bill yield rose by about 14 basis points to 2.08%, the 5-year Philippine FXTN rose by about 52 basis points to 5.78%, and the 10-year Philippine government bond yield rose by about 75 basis points to 6.72%.

Fund Performance. The Fund returned -1.19% for the month, underperforming its benchmark by 27 basis points. Year-to-date, return amounted to -3.06%, underperforming its benchmark by 96 basis points.

Fund Strategy. The fund will maintain its current underweight position, in terms of duration. Investors in the bond fund must be prepared to withstand short-term volatility as higher investment value is normally achieved over the medium- to long-term.
