OUTLOOK AND STRATEGY

Market Review. In November, local bond yields saw a month-on-month decline of 9.27 bps across the curve. Short-term yields (1 year and below) declined by an average of –3.48 basis points. The decline was most notable in the intermediate part of the curve as investors look to lengthen duration. The two and three-year declined the most by 18bps and 17 bps, respectively followed by the five-year with a 14 bps decline. The long-end also declined to the tune of 4 bps with growth prospects at risk.

The BPI Money Market Index went up by 0.38%, BPI 1-5 Index up by 0.69%, and the BPI GS Overall Index up by 0.73%.

October inflation came out at 1.7%, still below the government's 2 to 4 percent target range for the year. 3Q 2025 GDP also came out anemic at a print of 4%, lower than the 2Q print of 5.5%. The BSP surprised the market with a rate cut on October, moving ahead of potential economic slowdown amidst governance concern that dampened business sentiment. The dovish tone caused markets to price in further rate cuts going into December and 2026. Rates now stand at 4.75% after the cut. Market is expecting policy rate may reach 4% in 2026.

Fund Performance. The Fund returned 0.55% for the month, on par with its benchmark. Year-to-date, return amounted to 3.91%, underperforming its benchmark by 143 basis points.

Fund Strategy. Maintain overweight duration position in view of yields declining in the medium term. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
