OUTLOOK AND STRATEGY

Market Review. Philippine government bond prices declined in May as yields rose sharply following a significant upside surprise in inflation. Headline inflation accelerated from 4.1% in March to 7.2% in April, well above market expectations of 5.5%. The increase was largely driven by higher fuel prices, elevated electricity rates, and faster rice inflation, indicating a broadening of price pressures.

Bond yields increased by an average of 61 basis points during the month. The 5-year benchmark yield rose from 6.87% to a high of 7.48% before closing at 7.34%. Investor sentiment remained cautious, with foreign investors posting net outflows of Php12 billion, bringing year-to-date outflows to Php251 billion.

Towards the latter part of the month, sentiment slightly improved amid positive developments in US-Iran negotiations, which helped ease concerns over global oil prices. Oil prices declined to below \$100 per barrel, providing some relief to inflation expectations.

During the month, the Bureau of the Treasury raised Php89 billion through its regular bond auctions, below its Php140 billion target, as the government opted to accept fewer bids in light of rising yields.

Fund Performance. The Fund returned -0.80% for the month, outperforming its benchmark by 8 basis points. Year-to-date, return amounted to -1.85%, underperforming its benchmark by 95 basis point.

Fund Strategy. The Fund favors the safety of shorter-dated securities and time deposits. With the expectation of increased volatility this year due to upside risks to inflation, the fund manager aims to maintain a nimble portfolio position to take advantage of any opportunities.
