OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) posted a strong rebound in June, supported by improving investor sentiment amid easing geopolitical tensions in the Middle East, a softer-than-expected domestic inflation print, and a slowdown in foreign selling activity.

On the global front, optimism surrounding renewed US-Iran peace talks drove crude oil prices lower for most of the month. It also boosted risk appetite across financial markets despite intermittent volatility as negotiations progressed toward month-end. Domestically, inflation for May came in at 6.8% year-on-year, significantly below the market consensus estimate of 7.8% and the Bangko Sentral ng Pilipinas' (BSP) forecast range of 7.1% to 7.9%. Despite the benign inflation surprise, the BSP raised its policy rate by 25 basis points to 4.75% and maintained its hawkish policy stance to address lingering inflation risks.

The PSEi advanced 4.65% month-on-month to close at 6,037.17 in June.

Market activity also improved during the period, with average daily value turnover reaching Php6.76 billion, equivalent to an 8.22% increase from the previous month. Foreign selling pressure likewise eased, as net foreign outflows moderated to US\$22 million during the month. Foreign participation remained robust, accounting for 53% of total market activity.

On a stock-specific basis, top gainers for the month include: CNPF (+18.32%), ICT (+18.27%), GLO (+12.31%). Meanwhile top laggards are as follows: DMCI (-17.58%), SCC: (-11.54%), PGOLD (-9.78%).

Fund Performance. The Fund returned 4.91% for the month, underperforming its benchmark by 5 basis points. Year-to-date, return amounted to 1.51%, underperforming its benchmark by 84 basis points.

Fund Strategy. The Fund will continue to track the Philippine Stock Exchange Index (Total Return) (PSEiTR).
