## Market Review. The JP Morgan Asia Credit Index (JACI) Philippines declined by 1.44% in December as Philippine dollar-denominated yields tracked movements in US Treasuries. The 10-year US Treasury bond yield jumped by 40 bps from 4.17% to 4.57% during the period. Global bonds sold off after the Federal Reserve (the Fed) revised its rate projections for 2025 onward. Despite cutting policy rates by another 25 basis points during the final FOMC meeting for the year, the Fed updated its dot plot to show 2 rate cuts for 2025 in liqu of the 4 cuts proviously shown. This along with higher inflation expectations caused investors to trip positions on

rates by another 25 basis points during the final FOMC meeting for the year, the Fed updated its dot plot to show 2 rate cuts for 2025 in lieu of the 4 cuts previously shown. This, along with higher inflation expectations caused investors to trim positions on their bond holdings for the month. Concerns over the inflation impact of incoming President Trump's policies likewise dampened sentiment in the fixed income market.

Despite weakness in the month of December, the JACI Philippines returned 2.98% for full-year 2024.

**Fund Performance.** The Fund returned -0.59% for the month, outperforming its benchmark by 22 basis points. Year-to-date, return amounted to 0.55%, underperforming its benchmark by 419 basis points.

Fund Strategy. The fund will maintain its current duration given the possible upside risks to global inflation.
