OUTLOOK AND STRATEGY

Market Review. The JP Morgan Asia Credit Index (JACI) Philippines gained 0.39% in December, despite a rise in Philippine dollar bond yields. Most of the yield curve steepening occurred in the mid-tenor segment, mirroring trends in U.S. Treasuries.

Global backdrop: Cooling U.S. inflation and mixed labor data provided the Federal Reserve room to ease policy. On December 10, the Fed cut rates by 25 basis points, signaling a more accommodative stance. However, strong demand at mid-month U.S. Treasury auctions pushed long-term yields higher, resulting in a steeper curve, short-term yields declined while long-term yields rose.

Domestic macro: Philippine inflation eased to 1.5% in November, remaining below the government's 2–4% target range and down from October's 1.7%. The Bangko Sentral ng Pilipinas (BSP) maintained a dovish tone, reinforcing expectations for further policy easing after its December rate cut. The policy rate now stands at 4.5%, with markets anticipating a potential move toward 4.0% in 2026.

Fund Performance. The Fund returned -0.03% for the month, underperforming its benchmark by 19 basis points. Year-to-date, return amounted to 22.89%, outperforming its benchmark by 1,552 basis points.

Fund Strategy. The fund will maintain its current duration given the possible upside risks to global inflation.
