OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) was able to bounce back in February amidst bargain-hunting following the sharp decline in January. The local bourse traded in a tight range as investors digested economic data releases such as January inflation figure—which came out steady at +2.9% or within BSP's range of +2.5% to +3.3%, the BSP policy rate pause, RRR cut, and largely in-line 4Q earnings results. Towards the end of the month, trading activity surged as MSCI rebalancing took place. The PSEi rose by 2.3% to close at 5,997.97 in February.

In terms of trading activity, the Average Daily Turnover soared by 24.8% to Php6.09 billion in February mainly buoyed by the MSCI rebalancing in the last trading day of the month. In terms of foreign activity, foreigners were net sellers yet again, registering at US\$145 million. Top foreign sold stocks were ALI (-US\$38.5 million), URC (-US\$36.7 million), and MBT (-US\$28.4 million). Foreign participation in February was at 53%.

On a per stock basis, the top three index gainers for the month include: SMC (+28.91%), JFC (+15.86%) and MONDE (+13.53%). Meanwhile, the bottom three performers were: EMI (-23.32%), BLOOM (-7.00%) and CBC (-6.99%).

Domestic fixed income assets performed well in February 2025, with the BPI Government Bond Index posting a return of 1.13% year-to-date. This came even after the Bangko Sentral ng Pilipinas (BSP) surprised investors and decided to keep their key interest rates steady in their February policy meeting. In lieu of a policy rate cut, the BSP announced a cut in the bank's Rate Reserve Requirement (RRR) from the current 7% down to 5%. This move is estimated to release PHP 300Bn of additional liquidity into the system which may cause rates to decline further. Another headwind was inflation with the CPI print for the month of January coming out at 2.9%, the same figure as in December. In spite of all these, the BSP is still widely expected to cut the policy rates by a total of 0.5% (50 basis points) in 2025. For the month of February, the BTr held a total of 4 issuances. All auctions received strong demand, with the 5-, 7-, 10- and 20-year papers seeing average awarded yields of 5.968%, 5.973%, 6.118% and 6.376%, respectively. March will continue to see issuances across the curve with 5-, 7, 10, 3- and 25-year papers slated to be offered.

Fund Performance. The Fund returned 1.55% for the month, outperforming its benchmark by 5 basis points. Year-to-date, return amounted to -3.12%, outperforming its benchmark by 36 basis points.

Fund Strategy. The Fund will accumulate on market dips as volatility from the upcoming Trump 2.0, geopolitical risks coupled with thin market liquidity continue to persist. The Fund's preference is for companies with leading market capitalization and good fundamentals as well as defensive and high-yielding stocks.

For the fixed income portion of the fund, the Fund will maintain its overweight position in terms of duration as the BSP is expected to continue lowering policy rates in 2025.
