## OUTLOOK AND STRATEGY

**Market Review.** In December, local bond yields posted a month-on-month increase of 10.26 basis points across the curve. Short-term yields of one year and below bucked the trend, declining by an average of 3.22 basis points. The rise in yields was most pronounced in the intermediate segment as investors took profits toward year-end. Five- and seven-year tenors saw the largest increases at 22.91 basis points and 20.51 basis points, respectively, followed by the three-year tenor, which rose by 19.09 basis points. Meanwhile, long-end yields eased by around 4 basis points amid growing concerns over economic growth prospects.

The BPI Money Market Index gained 0.32%, while the BPI 1–5 Year Index edged down by 0.01% and the BPI GS Overall Index declined by 0.16%.

On the macro front, November inflation settled at 1.5%, remaining below the government's 2% to 4% target range and easing from October's 1.7% print. The BSP maintained a dovish stance, reinforcing market expectations for further policy easing after cutting the monetary policy rate in December, with the possibility of additional cuts in 2026. Following the latest rate cut, the policy rate stands at 4.5%, with markets pricing in a potential move toward 4.0% in 2026.

**Fund Performance.** The Fund returned -0.27% for the month, underperforming its benchmark by 12 basis points. Year-to-date, return amounted to 3.87%, underperforming its benchmark by 277 basis points.

**Fund Strategy.** The Fund aims to maintain its duration position as interest rates are expected to decline in the medium term. Inflation has significantly eased, mainly driven by a gradual reduction in rice prices. In response, the BSP has continued to reduce its policy rate, which now stands at 4.50%. The central bank has also indicated the possibility of further rate cuts, amid economic growth concerns. Market volatility may persist due to ongoing uncertainties in the global economic landscape. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
