OUTLOOK AND STRATEGY

Market Review. Global fixed income assets recovered in November as expectations for interest rate cuts gained momentum. Early in the month, yields were elevated after US Federal Reserve Chair Jerome Powell said further cuts were not guaranteed, making investors cautious about a third consecutive cut at the December meeting.

As the month progressed, sentiment shifted towards a December rate cut. Softer economic data including weaker retail sales, downward revisions in jobs growth, and unemployment rising to a four-year high of 4.4% supported the case for easing. Dovish comments from key Fed officials also reinforced these expectations, helping bond markets rebound.

Outside the US, bond yield movements were mixed. Germany's 10-year Bund ended at 2.69% (+5 bps), the UK's 10-year Gilt at 4.44% (+3 bps), and Japan's 10-year government bond at 1.81% (+14 bps). Japan stood out as yields climbed sharply after the Bank of Japan signaled possible rate hikes amid inflation rising to 2.8%, above the 2.4% forecast. In the Philippines, dollar-denominated bond yields rose after GDP growth came in at 4%, well below expectations. The JP Morgan Asia Credit Index – Philippines posted a negative return of 0.25%.

Fund Performance. The Fund returned -0.10% for the month, outperforming its benchmark by 10 basis points. Year-to-date, return amounted to 7.03%, underperforming its benchmark by 33 basis points.

Fund Strategy. The Fund looks to maintain its duration position as interest rates are expected to decline in the medium term. Market volatility may persist due to ongoing uncertainties in the global economic landscape, particularly due to the rapidly evolving US trade policies. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
