OUTLOOK AND STRATEGY

Market Review. Global fixed income market saw mixed performances in October, with the Bloomberg Barclays Global Aggregate Total Return Index down by 0.25%. This came amid easing trade tensions between the US and China and shifting monetary policy expectations.

In the US, softer inflation allowed the Federal Reserve to cut rates by 25 basis points during its October meeting. However, Fed Chair Jerome Powell signaled that further cuts are not guaranteed, leading markets to anticipate a possible pause in the easing cycle. US Treasury yields declined across the curve, with the 2-year at 3.58%, the 10-year at 4.10%, and the 30-year at 4.67%.

Globally, long-term government bond yields also fell. The 10-year German Bund dropped to 2.65%, while the UK 10-year Gilt fell 28 basis points to 4.41%, following dovish comments from the Bank of England amid softer inflation and slower growth. Euro-area government bonds also saw declines, with Italian and Spanish 10-year yields down 18 and 11 basis points, respectively. Emerging market debt outperformed, returning 2.2%, supported by higher real yields and a weaker US dollar.

Meanwhile, Japanese government bonds underperformed, with 10-year yields rising slightly as markets anticipate further policy normalization from the Bank of Japan and potential fiscal expansion under new leadership.

Fund Performance. The Fund returned 0.52% for the month, underperforming its benchmark by 11 basis points. Year-to-date, return amounted to 7.13%, underperforming its benchmark by 45 basis points.

Fund Strategy. The Fund looks to maintain its duration position as interest rates are expected to decline in the medium term. Market volatility may persist due to ongoing uncertainties in the global economic landscape, particularly due to the rapidly evolving US trade policies. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
