## **OUTLOOK AND STRATEGY**

**Market Review.** Global fixed income assets gave positive returns in September, with the Bloomberg In the U.S., Treasury yields reversed August's decline, with all major maturities rising despite a 25-basis point rate cut by the Federal Reserve. The 2-year yield edged up to 3.57%, the 10-year yield rose to 4.11%, and the 30-year yield climbed to 4.73%. This uptick followed stronger-than-expected jobless claims data and Fed Chair Powell's cautious tone, emphasizing "risk management" rather than a full pivot toward easing.

Globally, long-term government bond yields showed mixed movements. The 10-year German Bund held steady at 2.71%, while French OATs fluctuated amid political uncertainty, ending at 3.47%. The UK 10-year Gilt yield dipped slightly to 4.15%, reflecting stable inflation and a hold on interest rates by the Bank of England. Investor sentiment remained cautious due to fiscal concerns and inflationary pressures across Europe.

In the Philippines, dollar-denominated bond yields declined, especially in longer tenors, contributing to a monthly return of 1.33% for the JP Morgan Asia Credit Index – Philippines. This was driven by price appreciation and stable interest income, as the Bangko Sentral ng Pilipinas maintained a dovish stance with a policy rate cut to 5.00%. The local bond market benefited from easing inflation and improving investor confidence.

**Fund Performance.** The Fund returned 1.19% for the month, underperforming its benchmark by 11 basis points. Year-to-date, return amounted to 6.58%, underperforming its benchmark by 32 basis points.

**Fund Strategy.** The Fund looks to maintain its duration position as interest rates are expected to decline in the medium term. Market volatility may persist due to ongoing uncertainties in the global economic landscape, particularly due to the rapidly evolving US trade policies. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
