OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange (PSEi) ended the year on a positive note and managed to close above the psychological 6,000 level. Lower-than-expected domestic November inflation print and rate cuts from both the US Federal Reserve (The Fed) and the Bangko Sentral ng Pilipinas' provided the lift. Meanwhile, ongoing worries over the country's slowing economic growth, peso weakness and foreign selling capped the upside. The PSEi closed 2025 at 6,052.92 or +0.51% on a month-on-month basis.

Trading activity slowed in December, with Average Daily Turnover at Php5.73 billion or 7.7% lower than in prior month's Php6.22 billion. Foreigners were net sellers with a hefty US\$202 million and were more active at 54% participation.

On a per stock basis, the top three index gainers for the month include: AGI (+16.50%), ALI (+10.32%) and CBC (+9.83%). Meanwhile, the bottom three performers were: PLUS (-33.88%), PGOLD (-9.52%) and SM (-5.47%).

In December, local bond yields posted a month-on-month increase of 10.26 basis points across the curve. Short-term yields of one year and below bucked the trend, declining by an average of 3.22 basis points. The rise in yields was most pronounced in the intermediate segment as investors took profits toward year-end. Five- and seven-year tenors saw the largest increases at 22.91 basis points and 20.51 basis points, respectively, followed by the three-year tenor, which rose by 19.09 basis points. Meanwhile, long-end yields rose by around 8.24 basis points amid growing concerns over economic growth prospects.

The BPI Money Market Index gained 0.32%, while the BPI 1–5 Year Index edged down by 0.01% and the BPI GS Overall Index declined by 0.16%.

On the macro front, November inflation settled at 1.5%, remaining below the government's 2% to 4% target range and easing from October's 1.7% print. The BSP maintained a dovish stance, reinforcing market expectations for further policy easing after cutting the monetary policy rate in December, with the possibility of additional cuts in 2026. Following the latest rate cut, the policy rate stands at 4.5%, with markets pricing in a potential move toward 4.0% in 2026.

Fund Performance. The Fund returned 0.45% for the month, outperforming its benchmark by 8 basis points. Year-to-date, return amounted to -0.85%, underperforming its benchmark by 198 basis points.

Fund Strategy. The Fund will remain defensive given heightening geopolitical tensions, peso depreciation and evolving local political risks. The Fund's preference is for companies with leading market capitalization, clear earnings growth drivers, dividend-paying and high-yielding.

For the fixed income portion of the fund, the Fund will maintain its overweight position in terms of duration as the BSP is expected to continue lowering policy rates in 2025.
