OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange index (PSEi) traded sideways most of the month as the market digested a mix bag of macro-economic developments. Investor optimism was evident on the release of May inflation print which turned out better than expected. This, in turn, fueled bets of another round of rate cuts by the Bangko Sentral ng Pilipinas (BSP). However, optimism soon turned into jitters on renewed geopolitical tensions in the Middle East leading to a spike in global oil prices and weakening of the Peso. Towards the latter part of the month, the market saw FTSE rebalancing where the country registered a down-weight en-route to a net foreign outflow. The PSEi rose modestly by 0.37% month-on-month to 6,364.94 in June.

In terms of trading activity, the PSEi recorded a healthy Average Daily Turnover of Php6.642 billion in June. Meanwhile, foreigners remained net sellers for the third straight month at US\$72 million, partly due to FTSE rebalancing.

On a per stock basis, the top three index gainers for the month include: BLOOM (+22.25%), ALI (+17.39%) and PGOLD (+16.13%). Meanwhile, the bottom three performers were: CBC (-10.12%), BPI (-6.54%) and BDO (-5.09%).

In June, the Philippine bond market saw significant ups and downs. This was mainly because of a brief conflict between Israel and Iran, which caused oil prices to jump and raised concerns about inflation. The 10-year Philippine bond yield rose by as much as 16 basis points before ending the month two basis points higher. As such, the BPI Philippine Government Bond Index returned 0.28%, bringing the first half of 2025 return to 2.47%. Meanwhile, the BPI Philippine Government Bond 1-5 Year Index returned 0.35%, with first half 2025 return at 3.04%.

Aside from the Israel-Iran war, investors also weighed local and global macroeconomic developments. Philippine inflation further fell to 1.3% in May, from 1.4% in April. In addition, the Bangko Sentral ng Pilipinas cut the policy rate by 25 basis points to 5.25%. In the US, the Federal Reserve kept rates steady at 4.25%-4.50%, as policymakers await more data to better assess the impact of US import tariffs on the economy.

Looking ahead, we expect market volatility to continue due to global uncertainties, especially around US trade policies and geopolitical tensions. However, the local environment remains favorable for bond investments, thanks to low inflation, slower economic growth, dovish central bank, and fewer government bond auctions. Towards the end of June, the Bureau of the Treasury released its auction schedule for the third quarter, which showed an 11% decline in offering volume versus the initial schedule in the second quarter.

Fund Performance. The Fund returned 0.08% for the month, underperforming its benchmark by 39 basis points. Year-to-date, return amounted to 0.33%, underperforming its benchmark by 100 basis points.

Fund Strategy. The Fund will be opportunistic on market dips as volatility from the global front remains given sporadic situation over in the Middle East. The preference is for companies with leading market capitalization, good fundamentals and high dividend paying stocks.

For the fixed income portion of the fund, the Fund will maintain its overweight position in terms of duration as the BSP is expected to continue lowering policy rates in 2025.
