OUTLOOK AND STRATEGY

Market Review. Philippine government bond prices rebounded in June as yields declined sharply, supported by improving global risk sentiment and lower oil prices. International oil benchmark prices fell from \$92 to \$73 per barrel following positive developments in US-Iran negotiations, which led to a memorandum of agreement allowing the reopening of the Strait of Hormuz. While oil tanker flows have resumed, volumes remain below pre-conflict levels.

Domestic factors also contributed to the rally, as Philippine headline inflation surprised to the downside at 6.8% in May, below market expectations of 7.8%. The decline in oil prices further reinforced expectations of easing inflation pressures.

During the month, bond yields fell by an average of 32 basis points, with the 5-year benchmark yield declining from 7.34% to 6.75%. Despite the improvement in yields, investor sentiment remained cautious, with foreign investors recording net outflows of Php11 billion, bringing year-to-date outflows to Php265 billion.

The Bureau of the Treasury raised Php160 billion through its regular bond auctions, exceeding its Php140 billion target, as lower yields allowed the government to accept more bids.

The Philippine Stock Exchange Index (PSEi) posted a strong rebound in June, supported by improving investor sentiment amid easing geopolitical tensions in the Middle East, a softer-than-expected domestic inflation print, and a slowdown in foreign selling activity.

On the global front, optimism surrounding renewed US-Iran peace talks drove crude oil prices lower for most of the month. It also boosted risk appetite across financial markets despite intermittent volatility as negotiations progressed toward month-end. Domestically, inflation for May came in at 6.8% year-on-year, significantly below the market consensus estimate of 7.8% and the Bangko Sentral ng Pilipinas' (BSP) forecast range of 7.1% to 7.9%. Despite the benign inflation surprise, the BSP raised its policy rate by 25 basis points to 4.75% and maintained its hawkish policy stance to address lingering inflation risks.

The PSEi advanced 4.65% month-on-month to close at 6,037.17 in June.

Market activity also improved during the period, with average daily value turnover reaching Php6.76 billion, equivalent to an 8.22% increase from the previous month. Foreign selling pressure likewise eased, as net foreign outflows moderated to US\$22 million during the month. Foreign participation remained robust, accounting for 53% of total market activity.

On a stock-specific basis, top gainers for the month include: CNPF (+18.32%), ICT (+18.27%), GLO (+12.31%). Meanwhile top laggards are as follows: DMCI (-17.58%), SCC: (-11.54%), PGOLD (-9.78%).

Fund Performance. The Fund returned 3.81% for the month, underperforming its benchmark by 4 basis points. Year-to-date, return amounted to -1.04%, underperforming its benchmark by 224 basis points.

Fund Strategy. The Fund will continue to be defensive given the uncertainties globally amidst geopolitical tensions. The Fund's preference is for companies with leading market capitalization, clear earnings growth drivers, dividend-paying and high-yielding.

For the fixed income portion of the fund, the Fund looks to maintain a nimble portfolio position to take advantage of any opportunities as interest rates are expected to trend higher over the coming months. Local inflation has exceeded the BSP's target since March and may remain elevated due to higher oil prices and their indirect impact on other goods and services. This environment may prompt further policy rate hikes from the BSP.

Market volatility may persist in the near term, driven largely by global developments, and the Fund will be actively managed to navigate these conditions. Investors should note that bond funds may experience short-term price fluctuations, and returns are generally realized over a medium- to long-term investment horizon
