OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) went narrowly down for the month of June. Market sentiment was weak due to the depreciation of the Philippine Peso when it hovered near the Php59 level. In addition, the FTSE rebalancing related activity further pulled the local bourse to the year-low of 6,158.58. However, the market bounced towards the latter part of the month on bargain hunting as investors digested BSP Governor's dovish rhetoric and lower inflation outlook. The PSEi closed at 6,411.91 or 0.3% lower month-on-month in June.

Trading activity was subdued for the month. Average Daily Turnover only recorded at Php4.4 billion. Meanwhile, foreign activity continued to register net outflows at US\$104 million for June. Index proxies SM and AC both recorded the biggest outflow as market sentiment remained weak. Foreign participation improved from 46% to 48% for the month

On a per name basis, the top three index gainers for the month were: AEV(+10.70%), MBT (+8.86%) and ALI (+8.57%). Meanwhile, the bottom three performers include: MONDE (-16.07%), JGS (-15.97%) and CNPF (-14.27%).

Fund Performance. The Fund returned 0.84% for the month, outperforming its benchmark by 93 basis points. Year-to-date, return amounted to 1.04%, underperforming its benchmark by 13 basis points.

Fund Strategy. The Fund will retain its defensive position as inflation and geopolitical risks remain coupled with thin market liquidity. The Fund's preference is still for companies with leading market capitalization and good fundamentals as well as dividend paying stocks.
