OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange sharply dropped for the month on large foreign selling. Market sentiment went down largely due to the depreciation of the local currency when it traded north of Php58 against the dollar. This was mostly driven by a strong dollar after the US Federal Reserve (The Fed), according to the FOMC minutes of the meeting, said they may consider pushing back the rate cut amid growing inflation concerns. Moreover, MSCI rebalancing further added to the volatility of the market where the Philippines was estimated to have a US\$100-120-million worth of outflow. The PSEi closed the month of May at 6,433.10 or 3.99% lower on a month-on-month basis.

Trading activity improved mostly due to the MSCI rebalancing. Average Daily Turnover registered at Php7.6 billion. Meanwhile, foreigners continued to be big sellers at US\$174 million recorded in May. MSCI related name – AEV, was the top sold name after its deletion in the Standard Index. Property names were also sold heavily, while telecommunications were top foreign bought names. Consumer names, on the other hand, were mixed. Foreign participation declined to 46%.

On a per name basis, the top three index gainers for the month include: WLCON (+19.76%), ACEN (+15.66%) and CNVRG (+14.47%). Meanwhile, the bottom three performers were: AEV (-16.55%), BDO (-12.28%) and MBT (-11.36%).

Fund Performance. The Fund returned -3.68% for the month, outperforming its benchmark by 31 basis points. Year-to-date return amounted to 0.63%, outperforming its benchmark by 89 basis points.

Fund Strategy. The Fund will continue to track the Philippine Stock Exchange Index (PSEi).
