OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) suffered a 1.8% decline in July following a myriad of domestic and international macro-economic developments. The PSEi started off strong, on-pace to what it seemed like a breakout of the 6,500 level until overnight secondary share placements from two index heavyweights SM and SMPH pulled the market back. Corporate earnings also started to come out with mixed results. Meanwhile, on the international front, the US and the Philippines reached a tariff deal where Philippine exports to US will be levied by 19% while the US being charged with zero. Towards the end of the month, the benchmark index slumped even further as the peso weakened back to the 58-level following the US dollar's strength. The US Federal Reserve held its FOMC meeting where they decided to keep interest rates unchanged. After which, expectations of further rate cuts were somewhat trimmed following several favorable US economic data such as US Personal Consumption Expenditure still recording above targets and strong 2nd quarter US GDP at 3.0% quarter-on-quarter. The PSEi breached below the 6,300 level to close at 6,252.73 in July.

In terms of trading activity, the PSEi recorded an Average Daily Turnover of Php6.5 billion in July, or 1.07% lower on a month-on-month basis. Meanwhile, foreigners are still net sellers for the fourth straight month at US\$29 million, but with lower participation at 47%.

On a per stock basis, the top three index gainers for the month include: PGOLD (+11.11%), ICT (+9.00%) and EMI (+8.58%). Meanwhile, the bottom three performers were: BLOOM (-20.55%), AGI (-14.63%) and AEV (-9.17%).

Fund Performance. The Fund returned -1.80% for the month, underperforming its benchmark by 4 basis points. Year-to-date, return amounted to -2.64%, outperforming its benchmark by 159 basis points.

Fund Strategy. The Fund will continue to track the Philippine Stock Exchange Index (PSEi).
