## OUTLOOK AND STRATEGY

**Market Review.** The Philippine Stock Exchange sharply dropped for the month on large foreign selling. Market sentiment went down largely due to the depreciation of the local currency when it traded north of Php58 against the dollar. This was mostly driven by a strong dollar after the US Federal Reserve (The Fed), according to the FOMC minutes of the meeting, said they may consider pushing back the rate cut amid growing inflation concerns. Moreover, MSCI rebalancing further added to the volatility of the market where the Philippines was estimated to have a US\$100-120-million worth of outflow. The PSEi closed the month of May at 6,433.10 or 3.99% lower on a month-on-month basis.

Trading activity improved mostly due to the MSCI rebalancing. Average Daily Turnover registered at Php7.6 billion. Meanwhile, foreigners continued to be big sellers at US\$174 million recorded in May. MSCI related name – AEV, was the top sold name after its deletion in the Standard Index. Property names were also sold heavily, while telecommunications were top foreign bought names. Consumer names, on the other hand, were mixed. Foreign participation declined to 46%.

On a per name basis, the top three index gainers for the month include: WLCON (+19.76%), ACEN (+15.66%) and CNVRG (+14.47%). Meanwhile, the bottom three performers were: AEV (-16.55%), BDO (-12.28%) and MBT (-11.36%).

The Bureau of the Treasury (BTr) held four FXTN auctions in May. The 10-year FXTN 10-72 and 25-year FXTN 20-23 were fully awarded at average yields of 6.825% and 6.950%, respectively. Meanwhile, the new 20-year issuance, FXTN 20-27, was only partially awarded and priced at a coupon of 6.875%. The final bond auction for the month was FXTN 3-30, fully awarded at an average rate of 6.347%. Demand was generally healthy for the bonds issued throughout the month.

In the local space, April headline inflation rose by 3.8% year-on-year from the previous month's 3.7%. Food, transport, and restaurants were the main driver of inflation, though the increase in rice prices slowed for the first time in six months. Nonetheless, the inflation print remained within the central bank's 2 to 4% target range. The country's economy grew by 5.7% year-on-year for the first quarter of 2024, lower than consensus estimate of 5.9%. While net exports contributed positively for the period, other sectors such as private consumption and government spending appeared to be slowing. The first quarter GDP growth figure falls short of the government's official target of 6-7% for the year.

**Fund Performance.** The Fund returned -1.96% for the month, underperforming its benchmark by 15 basis points. Year-to-date, return amounted to 0.36%, underperforming its benchmark by 54 basis points.

**Fund Strategy.** The Fund will continue to be defensive, but also opportunistic, as volatility could persist given thin market liquidity and inflation risk is still on the upside. The Fund will focus on companies with leading market capitalization and good fundamentals.
