## OUTLOOK AND STRATEGY

**Market Review.** The Philippine Stock Exchange Index (PSEi) had a choppy month in November before ultimately settling higher. The local bourse almost fell to a cliff, reaching sub-5,600, following a slew of weak domestic economic data such as dismal 3Q GDP, uninspiring 3Q corporate earnings coupled with heightened political issues. Concerns over Federal Reserve Policy Rates due to prolonged US Government Shutdown likewise dragged investor sentiment. However, the market was lifted by local bargain-hunting towards the latter part of the month. The PSEi rose by 1.56% month-on-month to close at 6,022.24.

Trading activity surged in November with Average Daily Turnover registering at Php6.22 billion from Php5.00 billion following some key corporate action events such as the Maynilad (MYNLD) IPO and AREIT Secondary Share Placement. On foreign activity, foreigners turned “Net Buyers” at US\$78 million.

On a per stock basis, the top three index gainers for the month include: CNVRG (+22.26%), SMC (+21.77%) and PLUS (+16.95%). Meanwhile, the bottom three performers were: URC (-13.70%), JFC (-12.74%) and SCC (-11.95%).

In November, local bond yields saw a month-on-month decline of 9.27 bps across the curve. Short -term yields (1 year and below) declined by an average of -3.48 basis points. The decline was most notable in the intermediate part of the curve as investors look to lengthen duration. The two and three-year declined the most by 18bps and 17 bps, respectively followed by the five-year with a 14 bps decline. The long-end also declined to the tune of 4 bps with growth prospects at risk.

The BPI Money Market Index went up by 0.38%, BPI 1-5 Index up by 0.69%, and the BPI GS Overall Index up by 0.73%.

October inflation came out at 1.7%, still below the government's 2 to 4 percent target range for the year. 3Q 2025 GDP also came out anemic at a print of 4%, lower than the 2Q print of 5.5%. The BSP surprised the market with a rate cut on October, moving ahead of potential economic slowdown amidst governance concern that dampened business sentiment. The dovish tone caused markets to price in further rate cuts going into December and 2026. Rates now stand at 4.75% after the cut. Market is expecting policy rate may reach 4% in 2026.

**Fund Performance.** The Fund returned 1.29% for the month, outperforming its benchmark by 31 basis points. Year-to-date, return amounted to -0.62%, outperforming its benchmark by 117 basis points.

**Fund Strategy.** The Fund will continue to adopt a defensive stance amidst volatility from uncertainties on Fed Rate Decisions, Trump tariffs, geopolitics, and heightened local political risks. The Fund's preference is for companies with leading market capitalization, good fundamentals, dividend-paying and high-yielding.

On the fixed income front, the fund aims to maintain its duration position as interest rates are expected to decline in the medium term. Inflation has significantly eased, mainly driven by a gradual reduction in rice prices. In response, the BSP has continued to reduce its policy rate, which now stands at 4.75%. The central bank has also indicated the possibility of further rate cuts, amid economic growth concerns. Market volatility may persist due to ongoing uncertainties in the global economic landscape. Investors in a bond fund must be prepared to withstand volatility as higher investment value is typically achieved over the medium to long term.
