OUTLOOK AND STRATEGY

Market Review. The Philippine Stock Exchange Index (PSEi) rose for the third month in a row despite the early sell-off that transpired following the effectivity of US President Donald Trump's tariffs on April 2 and the succeeding announcement of reciprocal tariffs. Initially, the index sank to a 52-week low in the 5,800-level but managed to bounce back after the US President decided to take a "pause" on the tariffs, which lifted sentiment and supported a relief rally. Moreover, a slew of domestic macro-economic developments further propelled the recovery, these include March inflation coming out lower-than-expected at 1.8%, a 25 basis-point rate cut by the Bangko Sentral ng Pilipinas (BSP), as well as the continued appreciation of the Philippine peso. Given those, the PSEi climbed 2.82% to 6,354.99 in April.

In terms of trading activity, the Average Daily Turnover grew by 3.5% to Php5.80billion in April. In terms of foreign activity, foreigners turned net sellers, registering US\$54 million amidst the tariffs pronouncements. Top foreign sold stocks were ICT (US\$50.1 million), SMPH (US\$16.2 million), and JFC (US\$11.80 million). Foreign participation remained at 55% in March.

On a per stock basis, the top three index gainers for the month include: URC (+18.21%), BLOOM (+16.78%) and PGOLD (+13.70%). Meanwhile, the bottom three performers were: GLO (-12.17%), ACEN (-12.17%) and DMC (-7.67%).

April 2025 was a stable month for the Philippine local fixed income market, characterized by mixed movements in yields and strong investor demand for government securities. The market navigated through global economic uncertainties and local fiscal policies effectively. The BPI Philippine Government Bond Index returned 0.30% for the month as rates crept higher by 3 bps on average, mostly on the long end of the curve. Both domestic and international factors, including central bank policies, inflation trends, and geopolitical developments affected yield movements for the period.

The Bureau of Treasury (BTr) initially announced 4 FXTN auctions for the month. The first two were re-issuances of 5-year FXTN 7-70 and 7-year FXTN20-17, both fully awarded at average rates of 5.908% and 5.986%, respectively. The 15-year auction scheduled in the last week of April was cancelled to accommodate for the jumbo 10-year FXTN issuance. The government raised a total of PHP 300 billion of FXTN 10-73 with the coupon rate set at 6.375%.

Demand for government securities remained strong, particularly for medium-term bonds. On the other hand, short-term rates saw an increase due to position trimming to fund the settlement of new 10-year paper. Local inflation slowed further to 1.8% in March 2025, down from 2.1% in February. This easing inflation supported stable bond prices. The Bangko Sentral ng Pilipinas (BSP) eased its policy rate by 25 basis points bringing the benchmark rate to 5.50%. Moreover, the BSP reduced its risk-adjusted inflation forecast to 2.3% (from 3.5%) for 2025 and 3.3% for 2026.

Fund Performance. The Fund returned 1.48% for the month, underperforming its benchmark by 15 basis points. Year-to-date, return amounted to 0.96%, outperforming its benchmark by 142 basis points.

Fund Strategy. The Fund will be opportunistic on market dips as volatility from the global front remains given lingering uncertainties on US tariffs and escalating geopolitical tensions. The preference is for companies with leading market capitalization, good fundamentals and high-dividend paying stocks.

On the fixed income front, the fund will maintain its neutral duration given the potential uptick in inflation on the back of tariffs. We expect supply constraints and added costs to cause price increases across all major consumer items.
