INVESTMENT OBJECTIVE AND STRATEGY

The Fund aims to achieve investment returns that closely track the total return of the iBoxx ABF Philippines index, before fees and expenses, by investing in a diversified portfolio of peso-denominated sovereign, quasi-sovereign, and supranational bonds.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The ABF Philippines Bond Index Fund is for investors who:

- Are at least classified as moderately aggressive based on their risk profile.
- Have an investment horizon of at least five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	The fund invests in domestic government- issued/ guaranteed securities comprising the iBoxx ABF Philippines Index, exposing investors to the risk of loss arising from a rise in interest rates, which generally causes fixed income security prices to decline. Factors/ events that may lead to a rise interest rates include adverse market conditions, and/ or negative developments in domestic political and economic conditions.
Liquidity Risk:	Investors are exposed to the risk of loss due to the fund's inability to convert security holdings to cash immediately or in instances where conversion to cash is possible but at a highly disadvantageous price due to limited buyers/ sellers in the market, low trading volumes or market disruptions, among other reasons/ factors.
Related Party Risk:	Investors are exposed to actual or potential conflicts of interest in the handling of related party transactions by the Trustee, specifically, the execution of trade transactions with related counterparties.
Down-grade Risk:	Investors are exposed to the risk of loss arising from adverse changes in the prices of domestic government-issued/ guaranteed securities due to a downgrade in the credit rating of the Philippines.
Index Tracking Risk:	Investors are exposed to the risk of not being able to achieve a level of return that matches the index being tracked by the fund due primarily to operating and fund management expenses.

The Fund's investment outlets undergo proper screening and evaluation in accordance with the Trustee's accreditation process. The Fund may also use financial derivatives to hedge the portfolio against market and credit risks.

OUTLOOK AND STRATEGY

Market Review. The BPI Government Bond Index returned 0.49% in December, with benchmark government yields falling 2.99 basis points (bps) on average. Average daily trading volume fell to PHP14.880bn from November's PHP15.762bn with trades mostly seen on the short-end (3 months to 1-year papers) and belly (7-year papers) of the curve.

The Bureau of the Treasury (BTr) issued only two FXTNs in December, the 10- and 7-year tenors. However, following strong demand for its 5.5-year Retail Treasury Bond issuance last November, bids on both auctions were fully rejected. The BTr also released its January auction schedule, announcing four FXTN issuances (4-, 10- and two 7-year tenors) and four T-Bill auctions.

In the local economic space, November inflation further eased to 4.2% year-on-year, with the rise in food prices slowing even as energy costs remained elevated. As inflation is seen to be tempered moving into next year, most analysts believe there is room for the central bank to keep rates accommodative. In early December, the Department of Health shortened the duration between the COVID19 vaccine second dose and booster from six months to three months. This proved timely as the highly infectious COVID19 Omicron variant continued its global spread. The BSP kept the policy rate at its record 2% low during the last meeting for 2021, but raised its inflation forecast of 4.4% and 3.4% for 2021 and 2022, citing potential supply constraints on key food items and transport hike petitions as upside risks.

Fund Performance. The Fund continued to track the returns and duration of the iBoxx ABF Philippines. The Fund returned 0.42% for the month, closely tracking the benchmark index.

Fund Strategy. The iBoxx index will see minimal changes for the month. The Fund will rebalance to reflect any changes to continue to closely track the duration of its benchmark.

LIST OF PROSPECTIVE INVESTMENTS

ABF Philippines Bond Index Fund may invest in the following:

- (a) Index securities consisting of peso-denominated debt obligations issued or guaranteed by the Philippine Government, by an agency or instrumentality of the Philippine Government, by a Philippine Government sponsored entity or quasi Philippine Government entity and peso-denominated debt obligations issued by supranational financial institution, or by an agency or instrumentality of any supranational financial institution or by an entity sponsored by any supranational financial institution, in each case as determined by the Index Licensor and which are for the time being constituent securities of the iBoxx ABF Philippines Index.
- (b) Non-index securities consisting of peso-denominated securities which are issued by an issuer of any Index Security and are similar to comparable Index Securities and are likely to behave in such a manner that is consistent with the Investment Objective.
- (c) Bank deposits and such other investments allowed under regulations issued by the BSP.
